RE: PS Docket No. 06-229, WT Docket No. 96-86 and DA 07-4168
City of Independence, Missouri 700 MHz Relocation Certification Information

This filing is in response to the request for information dated December 12, 2007 and replaces the previous filing of October 16, 2007 in order to correct the signature certification verbiage and to further define the base station usage.

On behalf of the City of Independence Missouri, I am filing this letter to certify the number of narrowband mobile and portable radios that were in operation as of August 30, 2007 to be eligible for relocation costs to the new consolidated segments.

As indicated in the Second Report and Order, the following information is provided.

- 1) The total number of narrowband mobile and portable radios in operation in channel 63 and 68, and the upper 1 MHz of channel 64 and 69 is 1,061 units. The frequencies that are affected within the subject band fall within the state mutual aid blocks programmed in the radios and as such must be reprogrammed.
- 2) The area of operation of the mobile and portable units is within the boundary of Jackson County, Missouri.
- 3) The instructions ask for the total number of base stations and there location. The total number of narrowband base stations serving the mobile and portable radios in operation is 44. These stations support the mobile and portable units only during trunked radio operation. The frequencies used for trunked operation do not fall within the spectrum requiring change therefore there is no impact to the base stations as a result of the docket.

4) The location in, latitude and longitude, of the identified base stations are:

- a. Woods Chapel Tower, 39-2-5.6 N 94-18-22.8 W
- b. I-70 & 40 Hwy Tower, 39-2-48.0 N 94-26-26.4 W
- c. Massman Farm Tower, 39-5-54.3 N 94-21-45.1 W
- d. Lake City Army Tower 39-5-3.9 N 94-16-43.9 W
- e. Water Tower 39-5-49.9 N 94-26-14.2 W
- f. LaFarge Tower 39-8-43.0 N 94-23-58.0 W

5) Contact information for all 700 MHz equipment is:

James Lencioni
